Over the last couple of years I have visited China many times. I have developed a passion for the country, the people and the culture. I now have many friends in China.

For about 12 months I tried learning Mandarin using several learning tools that I purchased. My progress was very slow and I began to think I could not grasp the Chinese language.

Seeking another alternative I discovered Richards Learn Mandarin Course. This was the breakthrough I was looking for. In several weeks I progressed more than I did in the previous 12 months using other programs.

As I am in my late 50's it is probably more difficult for me to learn another language than it is for younger people. I am also extremely busy running my business so don't have much spare time to study.

Richards's course is very well structured and the support and follow up he provides is excellent. I now have the ability to have basic conversations with my friends in China. I am sure I would not have this ability without the training that Richards's course provides.

I thoroughly recommend Richard's Learn Mandarin course to anyone who wishes to learn the Chinese language. I also recommend this course to anyone contemplating doing business in China. Earning the respect of the people you do business with is critical to a successful outcome. The ability to speak Mandarin is very helpful in gaining their respect and trust.
